"Telepathic" filters and blocks phone calls

EnoCent's "Telepathic 100" is a new kind of phone filter that can block certain incoming calls while allowing others through. The user can program it at will.

The Telepathic 110 can be set to temporarily filter out unwanted calls by blocking the number they are made from; the user can see where the call is coming from. Blocked numbers are stored in a memory and the user can call them back when it's more convenient to do so. It's also possible to store the numbers of callers who should always be allowed to get through. The memory has a capacity of 80 numbers and the user can check the details of the last twelve incoming calls. Both anonymous and specific numbers can be blocked and calls can also be blocked on the basis of the area code. The software is in the following languages: Danish, Dutch, English, Finnish, French, German, Greek, Italian, Norwegian, Portuguese, Spanish, Swedish, and Turkish.
